EDUCATION

Texas A&M University

Master of Science in Computer Science (MSCS), Thesis Track

College Station, TX

Aug 2026 – May 2028

Coursework: Analysis of Algorithms, Artificial Intelligence, Security Engineering

Sardar Patel Institute of Technology - University of Mumbai

Bachelor of Technology in Computer Engineering, Minor in Management | CGPA: 9.46/10

Mumbai, India

Aug 2019 – May 2023

TECHNICAL SKILLS

Languages: Java, Python, SQL, NoSQL, JavaScript, C++, Bash

Backend & Distributed Systems: Spring Boot, Kafka, REST APIs, Microservices, WebSockets, FastAPI, GraphQL

Databases: PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, CI/CD, Git, GitLab

Testing & Practices: JUnit, PyTest, TDD, Code Review, System Design, Design Patterns, Agile

ML & AI Tooling: TensorFlow, scikit-learn, OpenCV, LangChain, FAISS, Claude, Copilot

EXPERIENCE

Barclays

Software Engineer - BA4

Pune, India

Apr 2025 – Aug 2026

- Replaced end-of-day batch processing with a **real-time Kafka consumer pipeline**, cutting event latency from a **24-hour** lag to near-zero with regulatory controls enforced in-stream.
- Migrated **100K+** credit card accounts off a retiring legacy system by building the **Java** service layer and data pipeline for Strategic Debt Manager, supporting **80+** business workflows and **5,000+** daily transactions.
- Shipped a PII tokenization module with the platform data team, securing **50K+** legacy plaintext records with **zero downtime** and a clean compliance audit.

Software Engineer - BA3

Jun 2023 – Mar 2025

- Built **Spring Boot REST APIs** in a service-oriented architecture that let customers self-select installment plans, serving **1,000+** daily requests for the My Payment My Plan workflow.
- Cut deployment time **75%** (2 hours to 30 minutes) by building a **Jenkins CI/CD pipeline** with automated code promotion and shell-scripted release gates.
- Automated release-wise component reporting across **85+** tasks with a **Python** JIRA API tool, saving **2+ hours** per release.

Rockmetric

Software Engineer Intern

Remote

Jan 2023 – Jun 2023

- Architected a distributed async task-processing layer with **Celery** and **Redis**, decoupling background jobs from request handling.
- Moved the export module from local file I/O to **async object storage** (MinIO/S3), cutting upload and retrieval latency by **40%**.

PROJECTS

Real-Time Auction Platform | Django, Kafka, WebSockets, PostgreSQL

- Architected an event-driven platform streaming live bids through **Kafka**, with **WebSockets** pushing real-time updates and cutting processing time **25%** versus polling.
- Designed and deployed the full backend, scaling to **100 concurrent users** across simultaneous auction rooms at **99.9% uptime** through a live campus event.

Support FAQ RAG Assistant | Python, S3, FAISS, spaCy, scikit-learn

- Built a **PII redaction** ingestion pipeline (**NER** plus rule-based matching) to sanitize support tickets before storage.
- Served sub-second (**< 800ms**) responses by clustering tickets on embedding similarity and routing queries via **FAISS** nearest-match, cutting live generation calls by **60%**.

LEADERSHIP AND ACHIEVEMENTS

Teaching Assistant, Python for Data Science Lab, SPIT (**120+** students)

Student Representative, Board of Studies, SPIT; mentored 5 engineers at Barclays

CCT Docker Hackathon, Barclays

Winner among 20 teams

BUK Code-A-Thon, Barclays

Finalist among 65+ teams

AthenaHack 2.0, AthenaSquare

2nd Runner-Up among 100+ teams
